

elipson® | Connect **Wi-Fi Receiver**

AUDIOPHILE NETWORK STREAMER

The Connect Wifi Receiver will allow you to stream in multiroom (CD quality) or in high resolution (Hi-Res) in solo mode, any music through your analog integrated amplifier.

You will be able to enjoy all the music available from streaming platforms (Qobuz, Spotify, Tidal, Deezer, Internet Radio,...), or from your stored music files.

It is compatible with all integrated amplifiers on the market by connecting directly to the amplifier's RCA connectors, or thanks to the RCA extension cable supplied.

The Connect Wifi Receiver is perfectly compatible with the other products of the ELIPSON CONNECT range.
