## Known limitations for the latest version (May 17<sup>th</sup>)

### Luna series – V1.2.3

- 1 extra future firmware update via USB needed for activating OTA operating system updates.
- For licenses, the LUNA series require an internet connection. Offline activation via USB will be implemented later.
- Changing IP settings requires a device reboot.
- Events with GPO must be reconfigured after updating to 1.2.3.
- End date of Events must be set to max 31/12/2037.
- Device could go to Recovery mode after OTA update, a reboot is needed in that case.
- Unexpected AGC behaviour

## Release on December 6<sup>th</sup> 2023

- Luna firmware version: 1.2.2

### New features

- Firmware updates of LUNA via AUDAC Touch™ on the same network. One last Luna firmware update (to 1.2.2) is needed via the front panel.
- Luna GPO triggering via Luna event handler and NCP105
- Event handler settings backup and restore via file browser
- VoiceFile support for messages on internal SDCard
- Luna bug fixes
  - No audio when mapping a mono sum input to an output
  - Mute status incorrect after repower
  - Linking output audio functions
  - Improved settings handling
  - Multiple small fixes and improvements

## Release on October 31<sup>st</sup> 2023

- Luna firmware version: 1.2.1

### New features

- Simple commands interface (routing/volume up-down) on the LUNA & the NWP series.
- Internal Event Handler on Luna.
- Luna bug fixes
  - Volume change ticks
  - In some situations no audio on output 1
  - Zone 1 test signal issue
  - MAC address shown incorrectly
- Luna device and VoiceFile settings backup and restore via file browser
  - Backup and restore of settings for Event handler will be available in November
- Dashboard widget for mixer slider

## Release: September 29<sup>st</sup> 2023

- Luna firmware version: 1.2.0

### New features

- Simple commands interface (routing/volume up-down) on the LUNA

## Release: September 21<sup>st</sup> 2023

- Luna firmware version: 1.1.1

### New features

- Voice file player available in Luna device settings

## Release: September 13<sup>th</sup> 2023

- Luna firmware version: 1.0.1

### New features

- Voice file player on the LUNA series (via USB).
- VU indication for all the Atellio family products.
- Ability to release licences back from a device.

- An error is shown when trying to enable a not licenced Dante channel in Touch. Dante channel names are not changed after activation but already have a default usable name.

## Release: August 31<sup>st</sup> 2023.

- Luna firmware version: 1.0.1
