

OVO3

CABINET SPEAKER

BUDGET AND QUALITY UNITED

The OVO3T is one of the most popular models of the Apart OVO-series. This series is loved for its price and sound quality and because of their elegant design these loudspeakers fit into every interior.

However we noticed that all other OVO models carry a 100 Volt version and a low impedance version. Except for OVO3T, this 3 inch loudspeaker is only suited for 100 Volt or 16 Ω systems. So we created OVO3, an 8 Ω impedance version of the OVO3T. This newcomer in the OVO Series can be used in more residential places and into smaller retail-stores, restaurants...

The OVO3 uses a bracket system that allows you to position the loudspeaker in a variety of different angles. In case you want to install the OVO3 on a flat surface, this can easily be done with the supplied pad. The sturdy ABS plastic housing guarantees years of trouble free musical enjoyment.

Of course we don't want to forget to mention that OVO3 is a small but perfect loudspeaker that likes to be used in combination with a subwoofer like the Apart SUBLIME. A combination OVO3/SUBLIME is a solution that will be almost unnoticeable as the SUBLIME subwoofer is extremely compact which allows you to hide it behind a closet or curtain.

TECHNICAL SPECIFICATIONS

Woofers	3 inch coated paper	IP classification	60
