

Highlights:

- 12 mm (Ø) outer diameter
- Gold contacts, scratch resistant black shell

These professional RCA connectors consist of a scratch resistant shell that is made of diecast zinc with a black chrome plating. The flexible cable insert at the back of the connector is made with a polyacetal bushing with an EPDM sealing jacket and can fit large cable diameters. Gold plating is provided on the contacts to ensure the most trustworthy communications.

These connectors are sold as pair.
